

STORZ ASSEMBLY WITH DRAIN VALVES

MODEL LVSTZ30

DESCRIPTION:

Lansdale's Storz Assembly Model LVSTZ30 contains all of the items needed for the complete installation of a 30° STORZ Connection. This kit includes a 30° STORZ FDC w/Cap, Wall Plate, 1/2" full port ball valve, 1/2" ball drip, 1/2" Galv. Tee and 2- 1/2" Galv. nipples. This type of complete connection allows for both automatic as well as manual draining of the FDC and associated piping.

FEATURES:

- STORZ Connections eliminate threading problems saving the Fire Department valuable time
- Complete assembly eliminates sourcing individual items and assembly time in the field
- Entire assembly is corrosion resistant
- Complies with all NFPA requirements
- Available Sizes: 4 Storz x 4 FNPT w/cap & accessories
5 Storz x 4 FNPT w/cap & accessories
5 Storz x 6 FNPT w/cap & accessories

INSTALLATION:

Installation of this item follows normal industry practice. Make sure all threads are clean, apply a thread sealant such as Lansdale's LANS SEAL to all male threads.

Do not overtighten threads as overtightening can damage threads causing leaks.
